AI Digitization Manager (m/f/d)

Description

Shape the future of the TLC Group

The world of work is changing.

AI is changing companies.

And we want to play an active role in shaping this development.

The **TLC Group** is active in the fields of **fire protection, ventilation, air conditioning, insulation and building technology** and continues to grow. That is why we are looking for someone who can integrate modern technologies into our group of companies in a meaningful way and help build new digital structures.

Who we are looking for

Not a classic IT administrator.

Not a pure theoretician.

But someone who:

- processes,
- recognizes opportunities,
- makes sensible use of modern AI tools
- and really gets things done.

Responsibilities

- Introduction and implementation of modern AI solutions
- Analysis and optimization of existing processes
- Development of digital and automated processes
- Development of smart workflows for administration, project management and sales
- Supporting our teams in the use of AI
- Testing and implementing new technologies
- Helping to shape the digital future of the TLC Group

Qualifications

- Enthusiasm for AI, digitalization and innovation
- Experience with tools such as ChatGPT, Copilot or automations
- Understanding of business processes
- Independent and solution-oriented way of working
- Motivation to actively shape change
- Hands-on mentality and initiative

An advantage:

- Experience with process automation
- Knowledge of digital workflows

Hiring organization

TLC Gebäude- und
Fertigungstechnik GmbH

Employment Type

Full-time

Beginning of employment

as soon as possible

Job Location

An der Novisol 4, 01665,
Klipphausen, Deutschland

Date posted

21. May 2026

- Project management experience
- Technical understanding

More important to us than perfect references are:
Ideas, motivation and strength of implementation.

Job Benefits

What you can expect

- A modern position for the future with a lot of responsibility
- Direct cooperation with the management
- Great creative freedom
- Exciting projects within the entire group of companies
- Quick decisions and short distances
- The opportunity to actively help build AI structures
- A company that really wants to implement innovation
