## Dual study program in industrial engineering / specialization in energy technology (m/f/d)

### Description

**Dual study program in industrial engineering / specialization in energy technology (m/f/d)**

**from 07/ 2025**

### Hiring organization

TL Concept GmbH

### Job Location

An der Novisol 2, 01665, Klipphausen, Sachsen, Deutschland

Location: Klipphausen

The construction industry is one of the most important sectors of the economy. The complex tasks require close networking between all those involved in construction. In order to attract young skilled workers in the long term, we offer the option of a dual course of study, which combines vocational training and a degree in just 4.5 years and thus two fully-fledged qualifications: skilled worker in the profession of industrial insulator and Bachelor's degree in industrial engineering/energy technology as an academic degree.

Your tasks during the practical training:

- The Bachelor's degree course is completed at Merseburg University of Applied Sciences. Vocational training takes place in the company and at the ÜAZ in Holleben.
- Active collaboration on the construction site as part of the training
- Supporting construction and project management in day-to-day business
- In addition to the engineering fundamentals, business management and construction law knowledge as well as special knowledge in the specialization of building technology are taught
- In addition to the intensive teaching of business management content, mathematical and physical knowledge as well as special knowledge in the specialization of energy technology is taught

What we expect:

- General higher education entrance qualification, entrance qualification for universities of applied sciences or subject-specific higher education entrance qualification
- Mathematical and scientific understanding
- A lot of initiative and the desire for personal responsibility and leadership

tasks

- Commitment, flexibility and determination
- Affinity for craftsmanship

What we offer:

- Dual study program with a future-oriented family business
- Comprehensive support during the study period by a senior partner
- Individual development of your relevant specialist knowledge as well as your social and personal skills
- A paid university education with a bachelor's degree, skilled worker qualification and attractive career prospects

If you would like to gain an insight, please contact us for an interview.

Take your career into your own hands. We look forward to receiving your application for 2025!
